| Ch / # | Amp Name       | Based on a:                                                                                                    | Options                                                                                                                 | Notes                                                                                                                                              |
|--------|----------------|----------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| A1     | '64 Black      | 1964 Fender Pro Reverb<br>    | <ul style="list-style-type: none"> <li>• Hi/Lo input</li> <li>• Bright on/off</li> <li>• Mod on/off</li> </ul>          | Classic blackface tones. Mid pot around 2:00 recreates the traditional Fender tonestack. Mod adds a little drive and midrange poke.                |
| A2     | '67 Bass       | 1967 Fender Bassman<br>       | <ul style="list-style-type: none"> <li>• Hi/Lo input</li> <li>• Bright 1/off/2</li> <li>• Mod on/off</li> </ul>         | The dirtier cousin of the Pro Reverb. Mod mode takes it up a notch for some crunchy rock n' roll action.                                           |
| A3     | Zen-Master     | 1990s Fender Tone-Master<br> | <ul style="list-style-type: none"> <li>• Channel A/B</li> <li>• FAT on/off</li> </ul>                                   | As used by Page, Grohl and Sambora. Bold, big cleans on channel A and American crunch on B.                                                        |
| A4     | Betsy          | Friedman Buxom Betty<br>    | <ul style="list-style-type: none"> <li>• Hi/Lo input</li> <li>• Bright 1/off/2</li> </ul>                               | Friedman's take on the brown/blackface tones of the 60s. Fat and clean, and digs overdrive pedals.                                                 |
| A5     | Loner          | Mesa Lonestar<br>           | <ul style="list-style-type: none"> <li>• Channel 1/2</li> <li>• Drive lo/med/hi</li> </ul>                              | Versatile Fender style amp as used by the wonderful Andy Timmons. Strat heaven.                                                                    |
| A6     | ExtSee (green) | Bogner Ecstasy 101B<br>     | <ul style="list-style-type: none"> <li>• Pre-EQ B1/N/B2</li> <li>• Boost on/off</li> </ul>                              | The versatile, Fender-inspired green channel. Blue and Red channels are available on channel B.                                                    |
| A7     | .50"           | Boogie .50 Caliber +<br>    | <ul style="list-style-type: none"> <li>• Bright on/off</li> </ul>                                                       | Lead channel only. As used by Pepper Keenan of Down and Corrosion Of Conformity notoriety.                                                         |
| A8     | +              | 1985 Boogie MkIIC+<br>      | <ul style="list-style-type: none"> <li>• Bright on/off</li> <li>• Treble Shift on/off</li> <li>• Deep on/off</li> </ul> | The legend that keeps keeping on, from Lukather to Petrucci. Lead channel only.                                                                    |
| A9     | ++             | 1985 Boogie MkIIC++<br>     | <ul style="list-style-type: none"> <li>• HET on/off</li> <li>• Treble Shift on/off</li> <li>• Deep on/off</li> </ul>    | When the C+ doesn't have enough gain! The HET switch kicks in a preset EQ that scoops the mids even harder, tightens the lows and adds aggression. |

| Ch / # | Amp Name   | Based on a:                                                                                                     | Options                                                                                                                   | Notes                                                                                                                                |
|--------|------------|-----------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| A10    | III        | 1985 Boogie MkIII<br>          | <ul style="list-style-type: none"> <li>Bright on/off</li> <li>Treble Shift on/off</li> <li>Deep on/off</li> </ul>         | Early MkIII tones - simliar to the C+ but has a different upper-mid character. Lead channel only.                                    |
| A11    | III Red    | Boogie MkIII red stripe<br>    | <ul style="list-style-type: none"> <li>Bright on/off</li> <li>Treble Shift on/off</li> <li>Deep on/off</li> </ul>         | The most aggressive Mark in the vault. Lead channel only.                                                                            |
| A12    | IV         | Boogie MkIV<br>                | <ul style="list-style-type: none"> <li>Bright on/off</li> <li>FAT on/off</li> <li>Voicing: Mid Gain /Harmonics</li> </ul> | The last great Mark? Tight and articulate 90s tones. Lead channel only.                                                              |
| B1     | HW50       | Hiwatt Custom 50<br>           | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>3-pos channel blend</li> </ul>                                | Classic Hiwatt spank and sparkle. Time to practice your windmills                                                                    |
| B2     | M45        | 1965 Marshall JTM45<br>       | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>Mod on/off</li> </ul>                                         | The amp that started a revolution. Mod mode gets into Angus territory. High treble channel only.                                     |
| B3     | '69 Plexi  | 1969 Marshall Super Lead<br> | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>Bright 1/off/2</li> <li>3-pos channel blend</li> </ul>        | THE sound of rock n' roll. Bright 2 (4700pF) is the classic, aggressive Plexi sound, and 2 (100pf) is great for low gain and cleans. |
| B4     | '71 Bass   | 1971 Marshall Bass<br>       | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>Bright 1/off/2</li> </ul>                                     | Players figured out early on that many so-called "Bass" amps were exceptional guitar amps. It's true.                                |
| B5     | '79 Master | 1979 JMP 2203<br>            | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>Bright 1/off/2</li> <li>Mod on/off</li> </ul>                 | Classic master volume tones with some extra features, e.g. Lo input with bright 1 makes for excellent cleans.                        |
| B6     | '82 Master | 1982 JCM800 2203<br>         | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>Bright 1/off/2</li> <li>Mod on/off</li> </ul>                 | A more aggressive, obnoxious voicing than the JMP version. 500 and 1000pf (stock) bright options, and an extra spicy modded mode.    |

| Ch / # | Amp Name  | Based on a:                                                                                                       | Options                                                                                                            | Notes                                                                                                                               |
|--------|-----------|-------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| B7     | José      | <p>José-modded JMP</p>           | <ul style="list-style-type: none"> <li>Bright 1/off/2</li> <li>Drive lo/med/hi</li> <li>Clipping on/off</li> </ul> | Our genuine José Arredondo JMP sonically cloned to perfection. Optional clipping mode.                                              |
| B8     | Green Amp | <p>Dookie-modded Plexi</p>       | <ul style="list-style-type: none"> <li>Mode: Dookie/P90</li> </ul>                                                 | Dookie modded based on a Plexi clone that was modded by Martin Golub back in the day. P90 mode is our take on 2000's BJA tones.     |
| B9     | Camron    | <p>Caneron-modded JMP</p>        | <ul style="list-style-type: none"> <li>Bright 1/off/2</li> <li>Clipping on/off</li> </ul>                          | The purple monster recreated in all its glory. Sublime modded JMP tones with optional clipping mode.                                |
| B10    | Appetite  | <p>Marshall AFD-100</p>          | <ul style="list-style-type: none"> <li>AFD / #34 mode</li> <li>Mod on/off</li> </ul>                               | We sonically cloned both modes of this cool signature amp. They sound cool, but mod mode gets you closer to the records.            |
| B11    | ÷         | <p>Divided by 13 LDW39</p>      | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>Bright on/off</li> </ul>                               | Fatter, smoother Marshall master volume tones from the boutique world. Great for thicker HB tones or for your Tele or Strat.        |
| B12    | SL100     | <p>Soldano SLO-100</p>         | <ul style="list-style-type: none"> <li>Clean/Crunch/OD</li> <li>Bright on/off</li> </ul>                           | All three options of this American classic sonically cloned, with bright option.                                                    |
| B13    | Shelly    | <p>Friedman Dirty Shirley</p>  | <ul style="list-style-type: none"> <li>Hi/Lo input</li> <li>Bright on/off</li> <li>Structure L/M/H</li> </ul>      | JTM45 meets a JCM800. Switchable bright and the deep control make our version more versatile than the OG!                           |
| B14    | BeFreed   | <p>Friedman BE-100</p>         | <ul style="list-style-type: none"> <li>BE/HBE mode</li> <li>SAT</li> <li>Voice: FAT/Off/C45</li> </ul>             | One of the best 'modern' Marshalls in recent years, especially for players who like their Brit gain a little more refined.          |
| B15    | JC        | <p>Friedman JJ-100</p>         | <ul style="list-style-type: none"> <li>JBE on/off</li> <li>Tight</li> </ul>                                        | Modern Cantrell tones and beyond with JBE (clipping) option. The tight switch works well for lower tunings with high gain settings. |

| Ch / # | Amp Name      | Based on a:                                                                                                   | Options                                                                                                                | Notes                                                                                                                 |
|--------|---------------|---------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| B16    | Helium        | Bogner Helios<br>            | <ul style="list-style-type: none"> <li>• Pre-EQ B1/N/B2</li> <li>• Input Plex/Hot</li> <li>• 70/80 mode</li> </ul>     | Channel 1 of Bogner's most "Marshallly" amp - complete with 70s and 80s (clipping) modes.                             |
| B17    | ExTSee (blue) | Bogner Ecstasy 101B<br>      | <ul style="list-style-type: none"> <li>• Pre-EQ B1/N/B2</li> <li>• Blue/Red channel</li> <li>• Boost on/off</li> </ul> | Blue and Red channels from Bogner's flagship model. The Green channel is available in Amp Vault A.                    |
| B18    | Rev Blüe      | Bogner Über & Ultra<br>      | <ul style="list-style-type: none"> <li>• Über/Ultra</li> <li>• Tightness</li> <li>• Density</li> </ul>                 | Two filthy amps in one. We've sonically cloned our favorite tones from our Rev Blue <i>and</i> Über Ultra - enjoy.    |
| B19    | WZ-MC         | Wizard Modern Classic II<br> | <ul style="list-style-type: none"> <li>• Rhy/Lead</li> <li>• Boost on/off</li> <li>• Contour lo/hi</li> </ul>          | Both channels from this legendary Jubilee-inspired Canadian classic accurately recreated.                             |
| B20    | WZ-MT         | Wizard MTL<br>              | <ul style="list-style-type: none"> <li>• Shift on/off</li> <li>• Boost on/off</li> <li>• Saturation 1-5</li> </ul>     | The lead channel from this boutique quake-inducer. Kick in the GEQ for some extra sculpting and fun.                  |
| B21    | 50/50         | 1990s Peavey 5150<br>      | <ul style="list-style-type: none"> <li>• Bright on/off</li> <li>• Green/Red ch.</li> </ul>                             | Cheap and cheerful it may be - but the 5150 has officially reached legend status in our eyes.                         |
| B22    | Erect         | Mesa Dual Rectifier<br>    | <ul style="list-style-type: none"> <li>• Rev C/Rev G</li> </ul>                                                        | Red channel / vintage mode of both a 90's Rev C and Rev G. Boosted or not, they're both supremely satisfying to play. |
| B23    | V3/4          | Diezel VH4<br>             | <ul style="list-style-type: none"> <li>• Channel 3/4</li> </ul>                                                        | Channels 3 and 4 from this German powerhouse. Deep at noon is a good starting point.                                  |
| B24    | Herman        | Diezel Herbert MkIII<br>   | <ul style="list-style-type: none"> <li>• Channel 2/3</li> <li>• Mid Cut off/1/2/3</li> </ul>                           | Channels 2 and 3 of the mighty Herbert complete with three Mid Cut options.                                           |

| Ch / # | Amp Name   | Based on a:                                                                                                  | Options                   | Notes                                                                                                                     |
|--------|------------|--------------------------------------------------------------------------------------------------------------|---------------------------|---------------------------------------------------------------------------------------------------------------------------|
| B25    | Ed         | Ed's 1968 Super Lead<br>    | • Era: 1978 / 1984        | Bright and crunchy VH1 tones and warmer 1984 tones both available - you provide the excellent playing.                    |
| B26    | Core       | Demeter TGP3 & Vox AC30<br> | • TGP & AC30 mode         | Dean from Stone Temple Pilots has always had great tone so here's our homage to his early filthy, and later chimey tones. |
| B27    | Superknown | Rectifier/JMP blend<br>     | • Rhy/Lead                | Our tribute to the great Marshall/Mesa blended tones heard on Soundgarden's classic Superunknown album. RIP CC.           |
| B28    | Jake       | JEL-modded JMP<br>          | • Mode: Plexi/JEL         | Great 80s modded Marshall tones that retain the snarl, plus a handy plexi mode.                                           |
| B29    | Jerry      | Early 90s Cantrell<br>     | • Facelift & Dirt         | Our take on Cantrell's first two album tones. Time to rattle them bones.                                                  |
| B30    | Jonesy     | Marshall/Diezel blend<br> | • Lateralus & 10,000 Days | Adam Jones of Tool always sounds great - so we dug deep and blended the DNA of a VH4 and JMP. Available in two flavors.   |
| B31    | Zen 1      | Zen Hotrod Plexi<br>      | none                      | Our special recipe modded-Plexi. Classic to 90s rock done with style.                                                     |
| B32    | Zen 2      | Zen High Gain<br>         | none                      | Searing British high gain tones for those that dream about a Wizard/Splawn hybrid.                                        |
| B33    | Zen 3      | Zen Metal Machine<br>     | none                      | Complete, unapolegetic filth in the Über meets 5150 domain. The GEQ takes it to another level, so experiment!             |
